Little Chauncy Pond, Northborough

General Information

Little Chauncy Pond is a 45 acre Great Pond located just north of Lake Chauncy off of Lyman St. in Northborough. The depth of Little Chauncy Pond is an average of 7 feet and a maximum of 15 feet. The waters are fertile and murky with an average visibility of 2 feet. The pond bottom consists of mud with areas of aquatic vegetation. Little Chauncy is bordered by a golf course to the northwest and by the Wayne F. MacCallum Wildlife Management Area (formerly Westborough WMA) elsewhere.

Recreational Access

MassWildlife manages a small dirt ramp (71°36'52.605"W 42°18'18.475"N) and 5 car dirt parking lot accessed via a dirt road off of Lyman Street. The dirt ramp is suitable for small trailered boats and canoes only. The parking area and access road can become quite muddy during rainy periods in the spring. Shore access is available in areas adjacent to the ramp and along the southern shore which lies within the Wildlife Management Area. Please contact the Central District MassWildlife office for additional information and/or restrictions pertaining to public access of Little Chauncy Pond.

Fish Populations

The following fish species were found during MassWildlife surveys: Chain Pickerel, Largemouth Bass, Black Crappie, Bluegill, Pumpkinseed, Yellow Perch, White Perch, Yellow Bullhead, Brown Bullhead, and Golden Shiner.

Fishing

Although small in size, Little Chauncy Pond offers anglers the opportunity to fish in a tranquil and largely natural setting. The pond is an excellent spot for catching panfish, Largemouth Bass, and Chain Pickerel which are abundant but with few larger individuals. Catching Yellow Perch through the ice is also very productive. When visiting Little Chauncy it is likely that you will be the only one on the water which only adds to the character of this small but serene waterbody. Little Chauncy has produced Chain Pickerel that meet minimum sizes for recognition by the Freshwater Sportfishing Awards Program.
