## Letter from Executive Director

# John W. Parsons

**“Studies such as this provide retirement board members, public officials and taxpayers with a critical tool with which to assess investment performance.”**

This report represents a further installment in a series of reports focused on the costs associated with the investment of the assets of these systems and is consistent with PERAC's statutory responsibility to provide “statistical and other reports and information to the Governor and the General Court and the public.”

The report details the management, custodian and consultant fees for each public pension system based on that system's 2022 Annual Statement of Financial Condition. Studies such as this provide retirement board members, public officials and taxpayers with a critical tool with which to assess investment performance. Using this report, board members are able to gauge their costs against those of their peers, public officials are able to analyze the management of the pension funds, and taxpayers can gain insight into the level of expenditure involved in this task. PERAC's effort in this area reflects its commitment to bring transparency to all aspects of retirement system management.

We are pleased to report that the average investment service provider fees for 2022 were 55 basis points or 0.55%. This is a drop from 58 basis points in the last report in 2018 and I commend retirement boards and investment vendors for their work and diligence towards these cost savings while striving to maximize investment returns for members and beneficiaries.

During 2022, a total of \$588.9 million was expended by the 103 public pension retirement boards for which we have data as they performed the vital task of investing

\$108.4 billion of system funds. The State and Teachers Fund spent \$357.3 million and local retirement boards incurred expenses of \$231.6 million.

The primary data source for the information published herein is the Schedule 7 filed by each retirement board as part of its 2022 Annual Statement of Financial Condition.

In assessing this material, it should be kept in mind that the level of cost, in and of itself, is neither a positive nor a negative. More important is whether the investment performance justifies the cost. In publishing this information PERAC makes no comment regarding any retirement board's asset allocation, investment strategy or manager/fund commitments.

On behalf of the Commission, I would like to thank the PERAC staff who prepared, reviewed and published this report, particularly, Sarita Yee and John Galvin for compiling the investment analysis. If you have any questions or comments, please contact Sarita at 617-591-8938 or [sarita.yee@mass.gov](mailto:sarita.yee@mass.gov) or John at 617-591-8927 or [john.p.galvin@mass.gov](mailto:john.p.galvin@mass.gov).

Sincerely,

John W. Parsons, Esq.  
Executive Director

EDUCATION and ADVOCACY

## INVESTOR BULLETIN

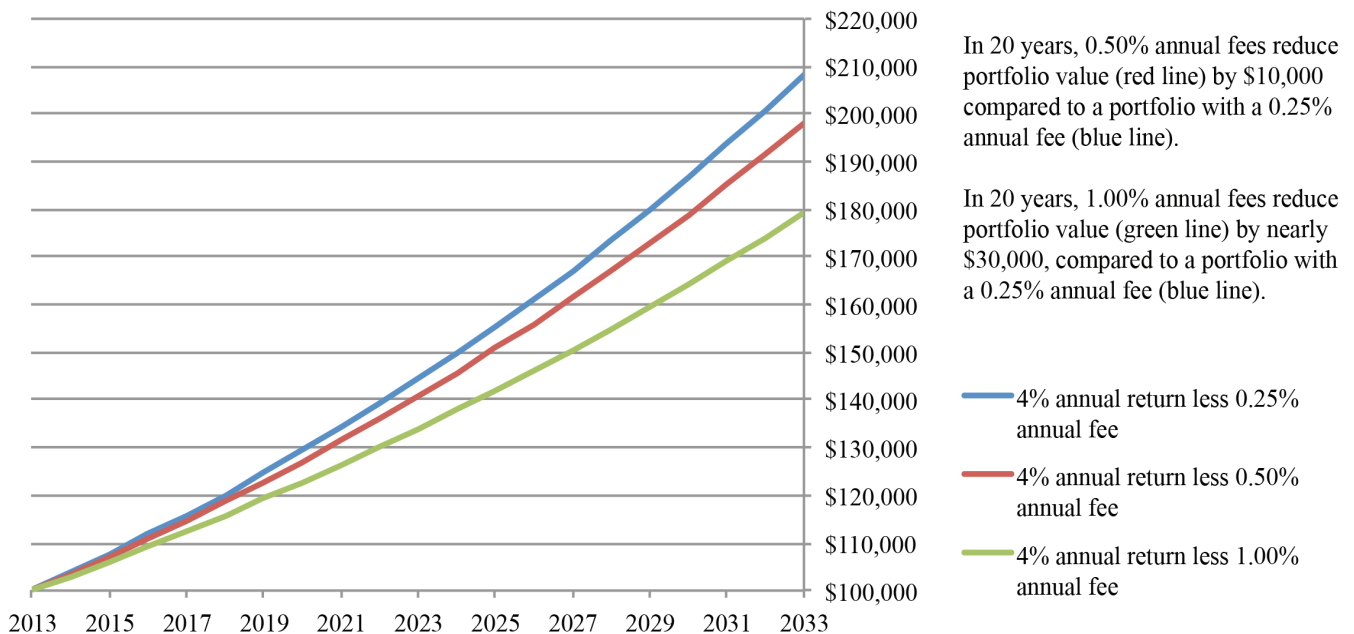

# How Fees and Expenses Affect Your Investment Portfolio

*The SEC's Office of Investor Education and Advocacy is issuing this bulletin to educate investors about how fees can impact the value of an investment portfolio.*

As with anything you buy, there are fees and costs associated with investment products and services.

***These fees may seem small, but over time they can have a major impact on your investment portfolio.*** The following chart shows an investment portfolio with a 4% annual return over 20 years when the investment either has an ongoing fee of 0.25%, 0.50% or 1%. Notice how the fees affect the investment portfolio over 20 years.

Portfolio Value From Investing \$100,000 Over 20 Years

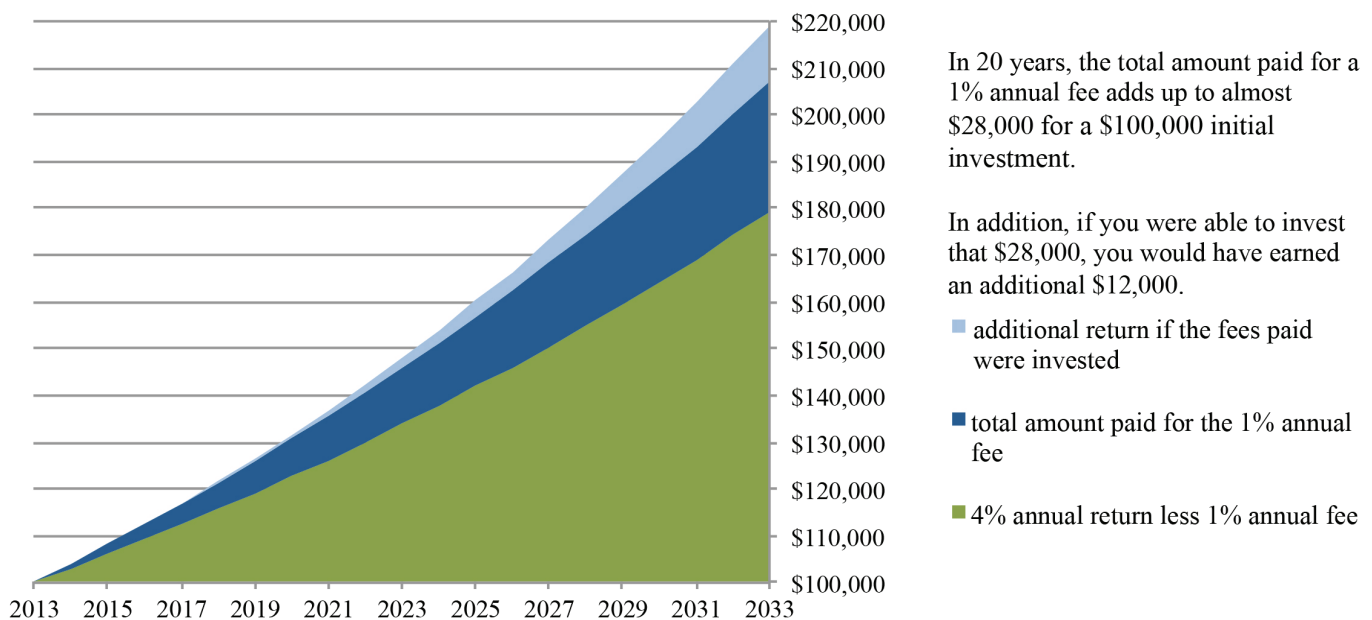

## How do ongoing fees affect your investment portfolio?

Ongoing fees can also reduce the value of your investment portfolio. This is particularly true over time, because not only is your investment balance reduced by the fee, but you also lose any return you would have earned *on* that fee. ***Over time, even ongoing fees that are small can have a big impact on your investment portfolio.*** The chart above illustrates the effect of different ongoing fees on a

\$100,000 investment portfolio with a 4% annual return over 20 years.

The chart below illustrates the impact of a 1% ongoing fee on a \$100,000 investment portfolio that grows 4% annually over 20 years. As the investment portfolio grows over time, so does the total amount of fees you pay. Because of the fees you pay, you have a smaller amount invested that is earning a return.

Illustration of Ongoing Fees Over 20 Years

# 1 | EXPLANATORY NOTES

This Expense Report is a helpful tool for retirement board members, public officials and taxpayers to analyze the costs associated with the management of the assets of the 104 public employee retirement systems in Massachusetts.\* However, this tool must be used judiciously and in proper context. Investment strategies and asset allocation drive investment returns. Some strategies and allocations require the payment of greater fees than others. Expenses must be assessed in conjunction with investment performance. The primary data source for the information published herein is the Schedule 7 filed by each retirement board as part of its 2022 Annual Statement of Financial Condition.

Under Massachusetts law retirement boards may opt to invest assets through the Pension Reserves Investment Trust (PRIT). In some instances, the Report categorizes systems as either “PRIT” or “Non-PRIT.” “PRIT” systems are those that have invested all but a minimal amount of assets in the Pension Reserves Investment Trust. In short, either system’s assets have been fully transferred to PRIT and are managed by the Pension Reserves Investment Management Board (PRIM) or all assets with the exception of limited holdings in non-public asset classes have been transferred to PRIT. “Non-PRIT” systems include those that have no assets invested in PRIT or those in which the retirement board has invested in various segments of the PRIT Fund but retained responsibility for investing most of the system assets.

The Expense Ratio in this report has been expressed in percentage points (%). Another method of reporting fees is in Basis Points, otherwise referred to as bps or “bips.” Basis Points also describe the cost to the Boards for engaging the Investment Service Providers (ISP) for their services. For example, the average of ISP expenses for the year, across all Boards, was 0.55% or 55 bps. This may also be expressed as \$5,500 per \$1,000,000 invested.

---

\*At publication time, data was available for 103 systems
